

Specification Guide

Groove™ is a semi-rigid, lightweight router-cut panel with precise angular designs that bend and distort light to create depth, nuance, and texture.

With 12 unique designs, Groove enables everything from subtle surface detailing to bold eye catching patterns. It can transform any space by introducing dynamic light play and dimensionality.

In everything we do

Groove™

Path to Specification

1. Space

What are the dimensions of the space you are designing?

2. Size

What panel dimensions are available?

3. Style

What styles are available?

4. Layout

What orientations are possible?

6. Detail Considerations

What install details should I consider?

7. Colours

What colours and finishes are available?

8. Technical Information

What are the technical specifications?

Quick Reference

Panel Dimensions

Width	1200mm
Height	2400mm, 2700mm (standard) <3600mm (MOQs apply)
Thickness	12mm, 24mm
If pattern matching different sized panels, e.g. 2400mm and 2700mm, please be sure to check the Standard Panel Sizes pages in this guide.	

Connection

Adhesive	Panels can be installed with appropriate adhesive (supplied by contractor)
SpinFix™	See SpinFix™ install guide
See Product Installation Guide for further details	

Unless otherwise specified, all Grooves will be 30 degrees, at 8mm deep

Standard Groove Angle

Panel side-edges are bevelled with half of the specified groove angle for seamless panel joins

Panel Join

Styles Overview

Stripe V1

Oblique V2

Mesh V3

Gable V4

Radial V5

Bloc V6

Bamboo V7

Facade V8

Whisp V9

Arc V10

Refract V11

Nova V12

Stripe V1

- Stripe style is equal divisions of vertical grooves across a panel
- The dimensions listed below are standard options, but can be changed if needed
- Unless specified otherwise, orders will be assumed to be all Panel A

Contact your Autex Acoustics specification manager for further options.

Panel side-edges are bevelled with half of the specified groove angle for seamless panel joins

Panel A - Standard Centres

Panel B - Half Centres

Panel C - Quarter Centres

Layout Option

Oblique V2

- Oblique style is equal divisions of angle grooves across a panel
- The dimensions listed below are standard options, but can be changed if needed
- Unless specified otherwise, orders will be assumed to be all Panel A

Contact your Autex Acoustics specification manager for further options.

Panel side-edges are bevelled with half of the specified groove angle for seamless panel joins

Panel A - Standard

Panel B

Layout Options

Match

Alternate

Mesh V3

- Mesh style is equal divisions of intersecting angled and vertical grooves across a panel
- The dimensions listed below are standard options, but can be changed if needed

Contact your Autex Acoustics specification manager for further options.

Panel side-edges are bevelled with half of the specified groove angle for seamless panel joins

Panel A

Layout Option

Match

Gable V4

- Gable style is equal divisions of angled grooves, mirrored along the centre of a panel
- The dimensions listed below are standard options, but can be changed if needed

Contact your Autex Acoustics specification manager for further options.

Panel side-edges are bevelled with half of the specified groove angle for seamless panel joins

Panel A

Layout Options

Match

Flip

Radial V5

- Radial style is equal divisions of concentric grooves on opposite corners of a panel
- The dimensions listed below are standard options, but can be changed if needed
- Unless specified otherwise, orders will be assumed to be all Panel A

Contact your Autex Acoustics specification manager for further options.

Panel side-edges are bevelled with half of the specified groove angle for seamless panel joins

Panel A - Standard

Panel B

Layout Options

Match

Alternate

Bloc V6

- Bloc style is equally-spaced vertical and horizontal grooves across a panel
- The dimensions listed below are standard options, but can be changed if needed

Contact your Autex Acoustics specification manager for further options.

Panel side-edges are bevelled with half of the specified groove angle for seamless panel joins

Panel A

Layout Option

Match

Bamboo V7

- Bamboo style is irregular vertical spacings with angled grooves between
- The dimensions listed below are standard options, but can be changed if needed
- Unless specified otherwise, orders will be assumed to be all Panel A

Contact your Autex Acoustics specification manager for further options.

Panel side-edges are bevelled with half of the specified groove angle for seamless panel joins

Panel A - Standard

Panel B

Layout Options

Match

Flip

Alternate

Facade V8

- Facade is a division of equal squares with a consistent notch detail in each
- The dimensions listed below are standard options, but can be changed if needed

Contact your Autex Acoustics specification manager for further options.

Panel side-edges are bevelled with half of the specified groove angle for seamless panel joins

Panel A

Layout Option

Match

Whisp V9

- Whisp is a pair of organic sweeping curves which are rotationally symmetrical
- The dimensions listed below are standard options, but can be changed if needed

Contact your Autex Acoustics specification manager for further options.

Panel side-edges are straight-cut to ensure clean, consistent joins

Panel A

Layout Option

Arc V10

- Arc is a group of sweeping tangent curves, which allow for tessellation on all panel edges
- The dimensions listed below are standard options, but can be changed if needed
- Unless specified otherwise, orders will be assumed to be all Panel A

Contact your Autex Acoustics specification manager for further options.

Panel side-edges are bevelled with half of the specified groove angle for seamless panel joins

Panel A - Standard

Layout Options

Match

Refract V11

- Refract is a division of equally-spaced vertical and horizontal grooves with an alternating pattern throughout
- The dimensions listed below are standard options, but can be changed if needed

Contact your Autex Acoustics specification manager for further options.

Panel side-edges are bevelled with half of the specified groove angle for seamless panel joins

Panel A

Layout Option

Match

Nova V12

- Nova is an array of truncated grooves, which collectively make a gridded pattern across panels.
- The dimensions listed below are standard options, but can be changed if needed

Contact your Autex Acoustics specification manager for further options.

Panel side-edges are straight-cut to ensure clean, consistent joins

Panel A

Layout Option

Standard Panel Sizes - Pattern Variation

Stripe V1

Stripe is equal vertical divisions of the panel.
The pattern can be matched across panels of any length.

Oblique V2

Oblique is based off a 600mm x 300mm grid.
The pattern matches when using standard 2400mm and 2700mm panels.

Mesh V3

Mesh is based off a 300mm x 300mm grid.
The pattern matches when using standard 2400mm and 2700mm panels.

Gable V4

Gable is equal divisions of the panel height and pattern repeat shifts with the change in length. The pattern does not match when using standard 2400mm and 2700mm panels.

Radial V5

Radial is corner-justified and shifts with the change in length.
The pattern does not match when using standard standard 2400mm and 2700mm panels.

Bloc V6

Bloc has equal 300mm x 300mm divisions.
The pattern matches when using standard 2400mm and 2700mm panels.

Standard Panel Sizes - Pattern Variation

Bamboo V7

Bamboo is centred and vertical grooves extend to the panel edge with the change in panel length. The pattern does not match when using standard 2400mm and 2700mm panels.

Facade V8

Facade stretches with the change in length. The pattern does not match when using standard 2400mm and 2700mm panels.

Whisp V9

Whisp stretches with the change in panel length. The pattern does not match when using standard 2400mm and 2700mm panels.

Arc V10

Arc is centred and vertical grooves extend to the panel edge with the change in panel length. The pattern does not match when using standard 2400mm and 2700mm panels.

Refract V11

Refract stretches with the change in panel length. The pattern does not match when using standard 2400mm and 2700mm panels.

Nova V12

Nova stretches with the change in panel length. The pattern does not match when using standard 2400mm and 2700mm panels.

Detail Considerations

Trimming Panel

Groove panels can be cut on-site if required.
We recommend using a snap-blade knife and straight edge.

Power Outlets and Light Switches

Measure and cut out where the outlet would sit on the panel.
Apply the panel to the substrate and secure the outlet through the panel.

Internal Corners

We recommend a simple lap-join install. If the opposite end of your wall has an exposed edge, we recommend starting the install from that end, and cutting the final panel to fit into this lap join.

For further installation details, please refer to the Groove Installation Guide.

Colours

Cube® Colours

Groove panels are available in the full range of Cube® colours.

Sound Materials

We're on a positive journey towards momentous change. It's about winning for the planet and its people, making a difference for healthy generations to come.

Sustainability is ingrained in everything we do, from fibre to finish. Our commitment to doing good now and in the future drives us to continuously evolve our practices, design with integrity, and take responsibility for the impact of our products. Our five sustainability pillars reflect this ethos, guiding our actions and shaping our decisions. Together, these pillars form a system that ensures our materials, products, and processes contribute meaningfully to a more sustainable world.

01

Climate change demands climate action

We are carbon neutral in everything we do.

02

Closing the loop

We are advocates for closing the loop on waste. We design with circularity front of mind.

03

Sustainable supply chain

We carefully select responsible suppliers and take action to mitigate unethical practices, and encourage good working conditions.

04

Supporting wellbeing in buildings

All our products are made using only safe materials. No harmful chemicals are present in our products.

05

Operating a business for purpose and profit

We strive to have a positive impact on our environment, our people, and the next generation.

Credentials

Sustainability isn't just a feature—it's a foundation. Our products are independently certified by trusted third-party certifications and labels to meet rigorous environmental and performance standards.

Our products also meet criteria for NABERS, WELL, LEED, Green Star, and BREEAM building rating systems, helping you achieve certification for your project.

Declare.

Our Journey to Nature Positive

We want to make a material difference to the planet and its people. That's why we're not resting on achieving carbon neutrality across the organisation and our products.

We're on a journey committed to Nature Positive, which ultimately delivers systems and products that contribute to biodiversity replenishment, carbon sequestration, and many positive environmental outcomes.

It's manufacturing that cares for human beings and the generations to come.

1967
Founded in Auckland, NZ, creating underfelt for the flooring industry.

1990
Established on-line recycling systems.

2020
Dematerialisation project, which reduced raw material by 30% for core product.

2017
First Environmental Product Declarations (EPDs) were published and started measuring GHG emissions.

2012
Reclaimed waste trimmings, reducing raw material use and associated emissions.

2021
We balanced all emissions from our acoustic products to zero.

2022
We balanced all emissions from our global operations to zero.

2025
We received the first NaturePositive+ Declaration in the construction industry for our first carbon negative product we launched in New Zealand. It uses a material with a -8.6 CO₂e carbon footprint.

Technical Information

Overview

NRC	0.45 - 0.80
Content	100% PET, min. 80% recycled
Form	Panel
Dimensions	1200mm x 2400mm, 1200mm x 2700mm
Thickness	12mm, 24mm
Origin	Made in Australia

Acoustic Performance

Groove is specifically designed to reduce and control reverberation and echo noise in building interiors.

Groove is made from Cube as the base material.

	Frequency (Hz)	125	250	500	1000	2000	4000	NRC
● 12mm Cube		0.05	0.10	0.30	0.65	0.90	0.95	0.45
● 12mm Cube (with 25mm air gap)		0.05	0.30	0.60	0.95	0.95	0.85	0.70
● 24mm Cube		0.05	0.20	0.60	0.90	1.00	1.00	0.70
● 24mm Cube (with 25mm air gap)		0.15	0.40	0.85	0.95	0.95	0.95	0.80

Fire Considerations

AS ISO 9705 - 2003 and AS 5637.1
Classification: **Group 1**

Fire test report available on request.

Ten Year Manufacturer's Guarantee

Product Specifications

- Hard body impact

There is no surface damage or penetration when subjected to hard body impacts. When adhered to 10mm plasterboard, the system can resist a 9 joule impact.
- Soft body impact

There is no surface damage or penetration when subjected to soft body impacts. When adhered to 10mm plasterboard, the system can resist a 70 joule impact.

- Microbial resistance (ASTM G21-15):
Growth rating: 0
- Colour fastness to light (ISO 105-B02:2014):
Rating: 6
- Determination of colourfastness to rubbing (ISO 105-X12:2016):
Dry assessment: 4 - 5
Wet assessment: 4 - 5
- Average % of water vapour sorption by weight after four days: 0.4%
